

An aerial photograph of the Rhode Island Department of Labor & Training building complex. The main building is a large, multi-story structure with a central tower and several wings. It is surrounded by a large parking lot filled with cars. To the left, there is a large green lawn with scattered trees. In the background, other buildings and a road are visible. The entire image has a blue tint.

home of the RI Department of Labor & Training

Preface

The Statistical and Fiscal Digest is published annually by the Rhode Island Department of Labor and Training's Labor Market Information Unit - the centralized state resource for the collection, analysis and dissemination of data pertaining to employment statistics in Rhode Island. DLT's primary function is the protection and advancement of the Rhode Island workforce. In order to fulfill its mission, the Department administers a variety of programs including temporary income support, reemployment services and occupational safety enforcement.

This digest contains summaries of funding sources and expenditures, as well as detailed activity reports for nearly all Department programs. A number of selected tables showing labor force, employment, unemployment and wage data are also included.

Rhode Island Department of Labor and Training

Marvin D. Perry, Director

DLT is an Equal Opportunity Employer/Program; Auxiliary Aides are available upon request to individuals with Disabilities.

An **Initial Claim** is a notice of unemployment, (first or subsequent), filed to request eligibility for unemployment benefits.

**Initial Claims
2002**

Temporary Emergency Unemployment Compensation
(TEUC)

2002

The Temporary Emergency Unemployment Compensation Act of 2002 provided up to 13 weeks of 100 percent federally funded unemployment insurance benefits to individuals throughout who exhausted all regular unemployment benefits available to them. TEUC benefits began March 2002. Unemployed workers who had a claim dating back to March 2001 were potentially eligible for this program.

Workshare is a voluntary Unemployment insurance program which provides employers with an alternative to layoffs. Employers participating in this program are allowed to divide available work hours among a specified group of employees as an alternative to totally laying off a portion of the group. Affected employees are eligible to receive a percentage of their unemployment insurance benefits equivalent to the reduction in hours. Workshare became effective in October of 1991.

Rhode Island Workers' Compensation Injuries

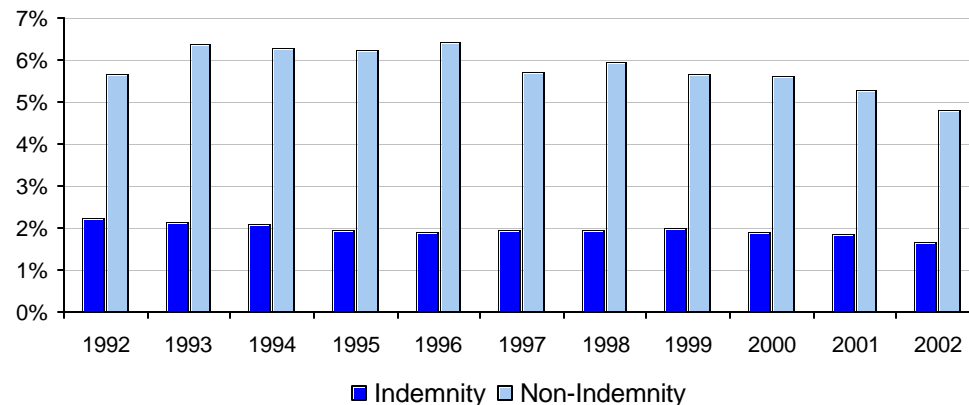

1992 -- 2002

An indemnity injury is a work-related injury or illness for which workers' compensation disability benefits are paid. For a non-indemnity injury, medical benefits may be paid, but workers' compensation disability benefits are not.

	1992	1993	1994	1995	1996	1997	1998	1999	2000	2001	2002

Worker's compensation is a no-fault system that requires employers to maintain insurance coverage to protect their employees from a work-related loss of earnings and medical expenses.

Employers with one or more employee have been required to carry workers' compensation insurance since 1999. Before 1999, insurance was only required of employers with 4 or more employees. The rate of injuries per employment before 1999 is slightly understated because the population covered by workers' compensation for those years was smaller than the employment figures used here.

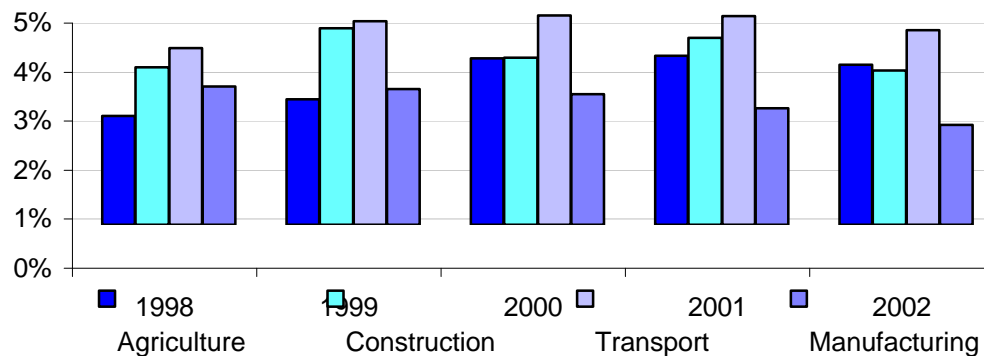

The rate of injuries per employment has declined from 7.9% in 1998 to 6.5% in 2002. The rate of indemnity injuries had been close to 2% from 1994 to 2000, but it declined slightly in 2001 and more in 2002. The non-indemnity rate is more variable, but it has declined steadily since 1998.

The sector of employment with the highest rate of injury per employment is transportation, communication, & public utilities. The agricultural sector has shown an increase in the injury rate from 2.2% in 1998 to 3.3% in 2002. The injury rate for construction peaked at 4 % in 1999, but has since declined to 3.1% in 2002. The irregular rates for mining are not valid because of the very low numbers in that category. The total rate of indemnity injuries per employment was steady at about 2%, but it declined to 1.6% for 2002.

* Total covered employment includes non-classified industry employment.

Indemnity injuries occur to workers in the 35 to 44 year old age category most often, possibly because of the age distribution of the work force. Injuries to workers in the 45 to 54 year old age category are the next most frequent, and they have increased steadily from 12% in 1992 to 21% in 2002. The slight decline in injuries to workers in the 19 to 24 year old and 25 to 34 year old ranges may also be due to the shift in age distribution of the work force.

Over an 11 year span from 1992 to 2002, an average of 62% of indemnity injuries occurred to males and an average of 38% of indemnity injuries occurred to females. Distribution of injuries by gender has remained fairly stable, with an increase of injuries to males rising from nearly 60% in 1992 to more than 64% in 1999. The distribution for 2002 shows 37% of injuries to females and 63% to males, very close to the 11 year average.

Sprains and strains are by far the most frequently occurring nature of injury for indemnity injuries. The percent of injuries with sprain or strain injuries averaging about 40% from 1998 to 2002. The next most frequently occurring indemnity injuries are contusion, crushing and bruise injuries, with an average of 11.4% over the last 5 years. Cut, laceration and puncture injuries are nearly as frequent, with an average of 10.4%. Multiple nature of injuries has a fluctuating frequency, as do inflammation or irritation of joints and muscles. This variation may be attributable to the way these are reported. The description of inflammation injuries is often vague. Fractures remain steady, with an average of 6% from 1998 to 2002.

From 1998 to 2002, an average of about 33% of indemnity injuries occurred to the back and trunk. Other body parts have a much lower frequency of injury. Injuries to the leg, including the foot and toes made up an average of 17% of indemnity injuries for the same time frame. Injuries to multiple body parts averaged about 11% of injuries from 1998 to 2002. For the same time period, injuries to hand and fingers were about 15% of injuries, and from arm to wrist made up an average of 11% of indemnity injuries.

Overexertion is the most frequently occurring type of injury. While overexertion accounted for about 30% of indemnity injuries from 1992 to 2000, the frequency dropped to 29% in 2001 and 26% in 2002.

The second most frequent indemnity injury type is a fall. From a low of 17.8% in 1997, the frequency of falls increased to 23.8% in 2001 and dropped to 22.7% in 2002.

Injuries where the worker was struck against or by an object are the next most frequent with 19% in 2002.

The frequency of bodily reaction injuries increased sharply in 2002. This may be due to inconsistent coding.

* Number of claimants and payments revised to include workshare equivalency data

1/ Represents the number of claimants who received a first payment during the calendar year.

2/ An exhaustion is that payment which exhausts all of the credits to which a claimant is entitled in a benefit year.

3/ Ratio of the number of claimants who exhausted all their credits during the calendar year, and the number who received a first payment during the twelve - month period ending June 30th.

The Temporary Disability Insurance (TDI) Program is entirely financed by worker contributions. In 2002, RI workers covered by TDI contributed in excess of \$155 million in taxes, and collected nearly \$151 million in benefits. At the end of 2002, there was nearly \$56 million available for benefits in the TDI fund.

Note: Figures may not add due to rounding.

Employment refers to those persons 16 years of age or older who did any work at all as paid employees during the reference week of the 12th of the month; worked in their own business or on their own farm, or worked without pay at least 15 hours in a family business or farm. Also included are persons who were temporarily absent from their jobs because of illness, bad weather, vacation, labor-management disputes or personal reasons.

Unemployment refers to those persons who had no employment during the reference week; who were available for work; and made specific attempts to find work during the four week period ending with the reference week. Persons laid off from a job and expecting recall need not be looking for work to be counted as unemployed.

Labor Force is the sum of the Employed and the Unemployed.

Unemployment Rate is the number of Unemployed as a percent of the Labor Force.

* The incorporation of new population controls that reflect Census 2000 data resulted in a break in the series between December 1999 and January 2000. It is difficult to make valid data comparisons to prior years.
